

Can you connect the bats to what they eat?

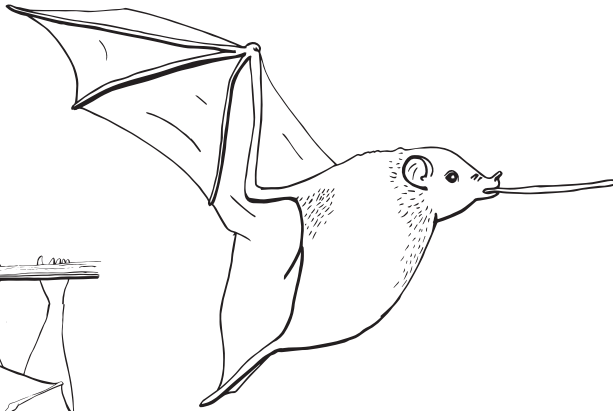

Pallid Bat

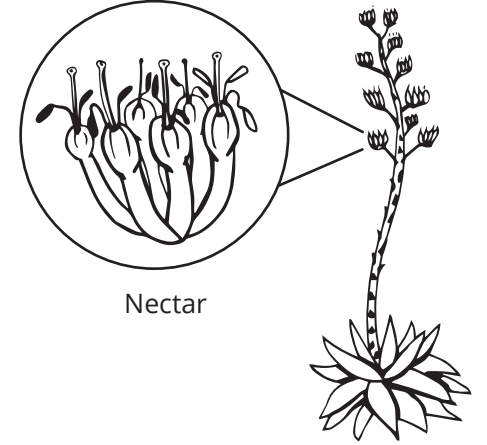

Greater Bulldog Bat

Mexican Long-nosed Bat

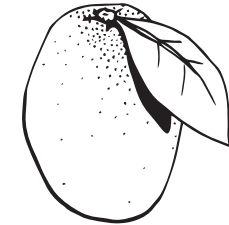

Golden-Crowned Flying Fox

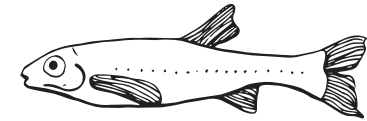

Nectar

Insects

Fruits

Fish and small mammals

Answers: Pallid Bat uses its ears to find nectar deep within flowers, and the Golden-Crowned Flying Fox lives in trees and can fly long distances to find fruits. Greater Bulldog Bat uses its large feet to catch fish, Mexican Long-nosed Bat uses its long tongue to reach nectar in flowers, and the Golden-Crowned Flying Fox uses its long snout to catch fish, Mexican Long-nosed Bat uses its long tongue to reach nectar deep within flowers, and the Golden-Crowned Flying Fox lives in trees and can fly long distances to find fruits.
